

ORDINANCE NO. 183593

An ordinance amending Section .12.04 of the Los Angeles Municipal Code by amending the zoning map.

THE PEOPLE OF THE CITY OF LOS ANGELES DO ORDAIN AS FOLLOWS:

Section 1. Section 12.04 of the Los Angeles Municipal Code is hereby amended by changing the zones and zone boundaries shown upon a portion of the zone map attached thereto and made a part of Article 2, Chapter 1 of the Los Angeles Municipal Code, so that such portion of the zoning map shall be as follows:

50 25 0 50 Feet

C.M. 183 B 105	APCSV-2014-3561-ZC
----------------	--------------------

LH/100

041415

Sec. _____. The City Clerk shall certify to the passage of this ordinance and have it published in accordance with Council policy, either in a daily newspaper circulated in the City of Los Angeles or by posting for ten days in three public places in the City of Los Angeles: one copy on the bulletin board located at the Main Street entrance to the Los Angeles City Hall; one copy on the bulletin board located at the Main Street entrance to the Los Angeles City Hall East; and one copy on the bulletin board located at the Temple Street entrance to the Los Angeles County Hall of Records.

I hereby certify that this ordinance was passed by the Council of the City of Los Angeles, at its meeting of MAY 29 2015.

HOLLY L. WOLCOTT, City Clerk

By  Deputy

Approved 6/3/15

Mayor

Pursuant to Section 558 of the City Charter,
The South Valley Area Planning Commission on
April 09, 2015, recommended this ordinance be
adopted by the City Council.

Randa M. Hanna, Commission Executive Assistant
South Valley Area Planning Commission

File No. 15-0526

(Q) QUALIFIED CONDITIONS OF APPROVAL

Pursuant to Section 12.32 G of the Los Angeles Municipal Code (LAMC), the following limitations are hereby imposed upon the use of the subject property, subject to the "Q" Qualified classification.

A. Development Conditions:

1. **Use.** The property shall comply with the use, restrictions/limitations, and area provisions of the R3 Zone, pursuant to LAMC Section 12.10.
2. **Height.** The Project shall not exceed 41 feet in height, as defined by Section 12.21.1 B.3 of the LAMC, and as shown on the project plans dated **September 11, 2014**, and labeled "**Exhibit A**", attached to the subject case file.
3. **Plot/Site Plan.** Prior to the issuance of any building permits for the subject project, detailed development plans, including site and elevation plans, and including complete landscape and irrigation plans prepared by a licensed landscape architect or architect, shall be submitted for review by Council District 3 and for review and approval by the Department of City Planning for verification of compliance with the imposed conditions. The plans submitted to Building and Safety shall be in substantial conformance with the plans dated **September 11, 2014**, and labeled "**Exhibit A**", attached to the subject case file. Minor deviations may be allowed in order to comply with provisions of the Municipal Code, the subject conditions, and the intent of the subject permit authorization.
4. **Landscaping (Open Areas).** All open areas not used for buildings, driveways, parking areas, recreational facilities or walks shall be attractively landscaped, including an automatic irrigation system, and maintained in accordance with a landscape plan prepared by a licensed landscape architect or licensed architect, and submitted for approval to the Department of City Planning. The landscape plan shall be in compliance with the landscape provisions of the RIO District, Section 13.17 of the LAMC. No trash or recycling areas shall be located within the landscaped setbacks.
5. **Open Space.** Open space as required by Section 12.21 G of the LAMC shall be provided and indicated on the project plans.

B. Environmental Conditions (ENV-2014-3562-MND):

6. **Air Pollution (Demolition, Grading, and Construction Activities).**

-All unpaved demolition and construction areas shall be wetted at least twice daily during excavation and construction, and temporary dust covers shall be used to reduce dust emissions and meet SCAQMD District Rule 403.

-Wetting could reduce fugitive dust by as much as 50 percent. The construction area shall be kept sufficiently dampened to control dust caused by grading and hauling, and at all times provide reasonable control of dust caused by wind.

-All clearing, earth moving, or excavation activities shall be discontinued during periods of high winds (i.e., greater than 15 mph), so as to prevent excessive amounts of dust.

-All dirt/soil loads shall be secured by trimming, watering or other appropriate means to prevent spillage and dust.

-All dirt/soil materials transported off-site shall be either sufficiently watered or securely covered to prevent excessive amount of dust.

-General contractors shall maintain and operate construction equipment so as to minimize exhaust emissions.

-Trucks having no current hauling activity shall not idle but be turned off.

7. Habitat Modification (Nesting Native Birds, Non-Hillside or Urban Areas)

-The project will result in the removal of vegetation and disturbances to the ground and therefore may result in the taking of nesting native bird species. Migratory nongame native bird species are protected by international treaty under the Federal Migratory Bird Treaty Act (MBTA) of 1918 (50 C.F.R Section 10.13). Sections 3503, 3503.5 and 3513 of the California Fish and Game Code prohibit take of all birds and their active nests including raptors and other migratory nongame birds (as listed under the Federal MBTA).

-Proposed project activities (including disturbances to native and non-native vegetation, structures and substrates) should take place outside of the breeding bird season, which generally runs from March 1- August 31 (as early as February 1 for raptors) to avoid take (including disturbances which would cause abandonment of active nests containing eggs and/or young). Take means to hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture or kill (Fish and Game Code Section 86).

-If project activities cannot feasibly avoid the breeding bird season, beginning thirty days prior to the disturbance of suitable nesting habitat, the applicant shall:

-Arrange for weekly bird surveys to detect any protected native birds in the habitat to be removed and any other such habitat within properties adjacent to the project site, as access to adjacent areas allows. The surveys shall be conducted by a qualified biologist with experience in conducting breeding bird surveys. The surveys shall continue on a weekly basis with the last survey being conducted no more than 3 days prior to the initiation of clearance/construction work.

-If a protected native bird is found, the applicant shall delay all clearance/construction disturbance activities within 300 feet of suitable nesting habitat for the observed protected bird species until August 31.

-Alternatively, the Qualified Biologist could continue the surveys in order to locate any nests. If an active nest is located, clearing and construction within 300 feet of the nest or as determined by a qualified biological monitor, shall be postponed until the nest is vacated and juveniles have fledged and when there is no evidence of a second attempt at nesting. The buffer zone from the nest shall be established in the field with flagging and stakes. Construction personnel shall be instructed on the sensitivity of the area.

-The applicant shall record the results of the recommended protective measures described above to document compliance with applicable State and Federal laws pertaining to the protection of native birds. Such record shall be submitted and received into the case file for the associated discretionary action permitting the project.

8. **Tree Removal (Non-Protected Trees)**

-Prior to the issuance of any permit, a plot plan shall be prepared indicating the location, size, type, and general condition of all existing trees on the site and within the adjacent public right(s)-of-way.

-All significant (8-inch or greater trunk diameter, or cumulative trunk diameter if multi-trunked, as measured 54 inches above the ground) non-protected trees on the site proposed for removal shall be replaced at a 1:1 ratio with a minimum 24-inch box tree. Net, new trees, located within the parkway of the adjacent public right(s)-of-way, may be counted toward replacement tree requirements.

-Removal or planting of any tree in the public right-of-way requires approval of the Board of Public Works. Contact Urban Forestry Division at: 213-847-3077. All trees in the public right-of-way shall be provided per the current standards of the Urban Forestry Division the Department of Public Works, Bureau of Street Services.

9. **Geotechnical Report.** Prior to the issuance of grading or building permits, the applicant shall submit a geotechnical report, prepared by a registered civil engineer or certified engineering geologist, to the Department of Building and Safety, for review and approval. The geotechnical report shall assess potential consequences of any soil strength loss, estimation of settlement, lateral movement or reduction in foundation soil-bearing capacity, and discuss mitigation measures that may include building design consideration. Building design considerations shall include, but are not limited to: ground stabilization, selection of appropriate foundation type and depths, selection of appropriate structural systems to accommodate anticipated displacements or any combination of these measures. The project shall comply with the conditions contained within the Department of Building and Safety's Geology and Soils Report Approval Letter for the proposed project, and as it may be subsequently amended or modified.

10. **Explosion/Release (Existing Toxic/Hazardous Construction Materials)**

-Due to the age of the building(s) being demolished, toxic and/or hazardous construction materials may be located in the structure(s). Exposure to such materials during demolition or construction activities could be hazardous to the health of the demolition workers, as well as area residents, employees, and future occupants. However, these impacts can be mitigated to a less than significant level by the following measure:

-(**Asbestos**) Prior to the issuance of any permit for the demolition or alteration of the existing structure(s), the applicant shall provide a letter to the Department of Building and Safety from a qualified asbestos abatement consultant indicating that no Asbestos-Containing Materials (ACM) are present in the building. If ACMs are found to be present, it will need to be abated in compliance with the South Coast Air Quality Management District's Rule 1403 as well as all other applicable State and Federal rules and regulations.

-(**Lead Paint**) Prior to issuance of any permit for the demolition or alteration of the existing structure(s), a lead-based paint survey shall be performed to the written satisfaction of the Department of Building and Safety. Should lead-based paint materials be identified, standard handling and disposal practices shall be implemented pursuant to OSHA regulations.

C. Administrative Conditions:

11. **Approval, Verification and Submittals.** Copies of any approvals, guarantees or verification of consultations, review or approval, plans, etc., as may be required by the subject conditions, shall be provided to the Department of City Planning for placement in the subject file.
12. **Code Compliance.** The area, height and use regulations of the (T)(Q)R3-1-RIO zone classification of the subject property shall be complied with, except where conditions herein are more restrictive.
13. **Covenant.** Prior to the issuance of any permits relative to this matter, an agreement concerning all the information contained in these conditions shall be recorded in the County Recorder's Office. The agreement shall run with the land and shall be binding on any subsequent property owners, heirs or assign. The agreement must be submitted to the Department of City Planning for approval before being recorded. After recordation, a copy bearing the Recorder's number and date shall be provided to the Department of City Planning for attachment to the file.
14. **Definition.** Any agencies, public officials or legislation referenced in these conditions shall mean those agencies, public officials, legislation or their successors, designees or amendment to any legislation.
15. **Enforcement.** Compliance with these conditions and the intent of these conditions shall be to the satisfaction of the Department of City Planning and any designated agency, or the agency's successor and in accordance with any stated laws or regulations, or any amendments thereto.
16. **Indemnification.** The applicant shall defend, indemnify and hold harmless the City, its agents, officers, or employees from any claim, action, or proceeding against the City or its agents, officers, or employees to attack, set aside, void or annul this approval which action is brought within the applicable limitation period. The City shall promptly notify the applicant of any claim, action, or proceeding and the City shall cooperate fully in the defense. If the City fails to promptly notify the applicant of any claim action or proceeding, or if the City fails to cooperate fully in the defense, the applicant shall not thereafter be responsible to defend, indemnify, or hold harmless the City.
17. **Mitigation Monitoring.** The applicant shall identify mitigation monitors who shall provide periodic status reports on the implementation of the Environmental Conditions specified herein, as to area of responsibility, and phase of intervention (pre-construction, construction, post-construction/maintenance) to ensure continued implementation of the Environmental Conditions.
