

MOTION

The Alliance College-Ready Public School expansion project is currently under construction. This project requires a setback dedication for the project. One of the issues that was presented during the entitlement process concerns the existing bougainvillea plants that are located partially in the public right-of-way. The school reports that the bougainvillea beautifies the right-of-way and acts as a graffiti deterrent, and the school is committed to maintaining it away from the edge of the sidewalk.

The City regulations do not allow plants with spines, thorns, sharp points or edges in a public right-of-way. Alliance College-Ready Public School agrees to assume all liability that may arise from thorny plants within the public right-of-way.

I THEREFORE MOVE that the Bureau of Engineering be directed to issue a revocable permit for the Alliance College-Ready Public School expansion project, for the recording of a nonstandard component of the project.
