

**FORM GEN. 160 (Rev. 8-12)**

**CITY OF LOS ANGELES**  
INTER-DEPARTMENTAL CORRESPONDENCE

**DATE:** February 22, 2018

**TO:** Honorable Mitch O'Farrell, Chair  
Honorable David Ryu, Vice Chair  
Honorable Curren Price, Jr., Member  
Arts, Entertainment, Parks and River Committee

**FROM:** Enrique C. Zaldivar, Director and General Manager  
LA Sanitation

**SUBJECT: CF# 16-0639 – PROGRESS REPORT ON THE LOS ANGELES RIVER REVITALIZATION MASTER PLAN**

On November 29, 2017, LA Sanitation (LASAN) reported on Council Motion# 16-0639 (O'Farrell – Blumenfield – Martinez) on the LA River Water Quality Monitoring Program.

LASAN was instructed to return to this Committee with a revised draft LA River Water Quality Testing and Notification Protocol that reflects input from river stakeholders in a review of the effectuation of the draft protocol.

The attached draft protocol includes the following revisions:

1. A Closure Advisory will be issued when testing results exceed 576 MPN/100 mL ("Limited-REC-1") at two or more of the sampling sites located in the recreation zone and accelerated monitoring will be initiated.
2. When sampling shows that less than two sampling sites in the recreation zone exceed 576 MPN/100 mL ("Limited-REC-1"), the Closure Advisory will be rescinded.

If you have any questions, please call Dr. Mas Dojiri, Assistant Director at (213) 485-2210.
