SERVICE CONDITIONS - LADWP OUTDOOR AREA LIGHTING

This service agreement (Agreement) is made between the Los Angeles Department of Water and Power (LADWP) and the customer named on the reverse side (Customer).

Character of Service: Unmetered photoelectrically controlled lighting service will be provided using the LADWP's streetlight or directional fixtures mounted on the LADWP's existing wooden distribution power poles. Service will be provided only where the LADWP deems that the installation will be of a permanent and established character.

Installation and Removal of Facilities: LADWP will install standard lighting equipment and will operate and maintain all necessary facilities which shall remain its sole property at all times. Standard lighting equipment includes a street light or directional luminaire, automatic control, and a standard support arm up to 15-feet in length for the streetlight luminaire and up to 48-inches in length for the directional luminaire. Non-standard installations are available at LADWP's discretion, but the Customer must pay the additional cost of such installation in advance.

LADWP shall not be required to install lighting equipment at locations where, in its judgment, the service may be objectionable to others or where there is unreasonable exposure to accidental or malicious damage. Furthermore, should any lighting equipment, once installed, prove to be so objectionable or vulnerable, LADWP shall have the right at any time to discontinue service and remove the lighting equipment.

Installations under this lighting service may be relocated or modified for an additional fee, payable in advance. Installations ordered removed or modified, or removed for delinquent payment and subsequently ordered restored within one year of removal will be subject to a charge for all such removal and restoration costs, payable in advance of restoration.

Service furnished under this schedule will be discontinued at any location where overhead distribution lines supplying the service are subsequently converted to underground distribution.

Operation Schedule: Lamps will be lighted daily from dusk to dawn. LADWP does not guarantee continuous lighting during such periods, and shall not be liable to the customer or anyone else for damage, loss or injury resulting from any interruption in such lighting due to any cause.

Maintenance: LADWP will make any necessary repairs or lamp replacement typically within 3 working days after being notified of a lighting outage by the customer, but only during regularly scheduled weekday working hours. Please call LADWP's Customer Telephone Service at (1-800) DIAL-DWP (1-800-342-5397). Monthly bills will not be adjusted for outages.

Monthly Rates: The monthly rate(s) shown on the front side are guaranteed for a period of one year. LADWP may thereafter, from time to time, adjust the monthly rates.

Billing And Payment: Bills are due and payable on presentation and shall become delinquent nineteen days after the date of presentation. A Late Payment Charge amounting to 18% annual rate, computed on a daily basis, may be assessed on unpaid balances at the time the next bill is calculated. Current City of Los Angeles policy provides for ten (10) days notification prior to discontinuance of service for nonpayment. A fee will be charged for reconnection.

Early Disconnection Fee: The Customer agrees to pay \$100 per lamp terminated early if customer terminates part or all of this service less than one year after the installation date.

Satisfaction Guarantee: The Customer may terminate this service during the first 7 days of operation without penalty if Customer is not satisfied.

Liability: LADWP does not guarantee continuous lighting service. LADWP shall not be liable to the Customer or anyone else for damage, loss, or injury resulting from any interruption in lighting service for any reason, including but not limited to electric outages, equipment failures, vandalism, and disconnection for nonpayment of bills.
