Type of NC Board Action: For

Impact Information

Date: 02/13/2018

Update to a Previous Input: No

Directed To: City Council and Committees

Council File Number: 17-0447

Agenda Date:

Item Number:

Summary: The Los Feliz Neighborhood Council supports an ordinance to establish a 2,500-foot setback separating oil and gas extraction operations from sensitive land uses such as homes, schools, and hospitals. We also express gratitude to the City Council for the motion passed directing the City Attorney, Petroleum Administrator, and Department of Planning to perform a legal, land use, health, environmental, and economic study of such an ordinance.

There are over 1,000 active oil wells in the City of Los Angeles, and 80 percent of these wells are located within 2,500 feet of a sensitive land use. Oil and gas extraction sites routinely use and emit toxic chemicals, and these emissions are at their highest and most dangerous concentration at the source of pollution. Additionally, more than half of the active wells are located in low-income Latino and African-American neighborhoods, which are already overburdened by environmental hazards. Residents from these neighborhoods have documented serious health problems, in addition to daily disruption from drilling noise and vibrations, odors, and diesel truck traffic.

Precedent exists for a health and safety buffer around drilling sites in Los Angeles. The City amended its zoning code in the 1940s with the declaration that "oil drilling and production in urbanized areas is detrimental to the public health, safety, and welfare." Classifying these operations as non-conforming uses — meaning incompatible with residential neighborhoods — resulted in the closure of hundreds of active oil wells, especially on the West Side.

Every Angeleno deserves to live in a safe and healthy neighborhood. Oil drilling operations are wholly incompatible with residential neighborhoods, and we urge swift completion of the legal and land use study. Upon completion of the study, we support passage of a 2,500-foot setback ordinance to alleviate the symptoms and externalities that front-line communities experience daily.
