

MOTION

On December 13, 2017 the Los Angeles Department of Building and Safety (LADBS) issued an order to comply to the Board of Public Works for a slope failure on City right-of-way near 8489 Crescent Drive, between Crescent Drive and Wonderland Avenue. The estimated cost to construct a pipe and board structure, including asphalt berm and hydroseeding, is \$130,000. The repair will be performed by a contractor from the Bureau of Engineering's Pre-Qualified On-Call contractors list and construction is expected to last approximately three weeks.

I THEREFORE MOVE that the City Council, subject to the approval of the Mayor, APPROPRIATE \$130,000 from the Capital Improvements Expenditure Program (CIEP), Fund 100, Dept. 54, Account 00P234, entitled "Contingency for Construction" to a new account in CIEP, Fund 100, Dept. 54, to be entitled "Crescent Drive Slope Failure Project."

I FURTHER MOVE that the City Administrative Officer be authorized to make any technical changes as necessary to effectuate the intent of this motion.
