

MOTION

I, THEREFORE MOVE, that the City Council directs the City Attorney to initiate litigation in the event that either the federal Department of Energy or the California Department of Toxic Substance Control takes action to approve their respective final environmental documents relative to clean up of Santa Susana Field Lab that is inconsistent with City Council's previously expressed desire that the site be cleaned consistent with the 2010 Administrative Order on Consent, which required the site to be cleaned to background levels. A motion will be introduced shortly to authorize the retention of outside counsel to assist the City Attorney in preparing for and litigating the case, along with approval of funding for outside counsel.
