

MOTION

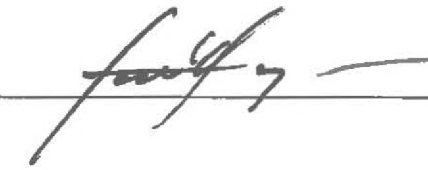

The Street Reconstruction/Vision Zero Program, also referred to as the "Complete Streets Program," was developed in response to instructions adopted as part of the Fiscal Year 2017-18 Budget. With a goal of maximizing efficiencies, the Program initially identified projects in areas where necessary Street Reconstruction and Vision Zero improvement overlapped. As the Bureau of Engineering progressed through preliminary design activity on six initial projects, opportunities were identified to incorporate sidewalk and green street elements into the proposed projects. As the scope of program elements expand, the project selection process should reflect a goal of maximizing efficiency by identifying projects with the potential to incorporate multiple benefits.

I THEREFORE MOVE that Council instruct the Bureau of Engineering, the Bureau of Street Services, the Bureau of Sanitation, and the Department of Transportation to report with recommendations for adopting a holistic project selection index to identify project locations which provide maximum opportunities for realizing multiple benefits including street reconstruction work; Vision Zero safety improvements; sidewalk repairs; and green street elements to address water quality issues and/or mitigate flooding.
