

MOTION HOMELESSNESS AND POVER

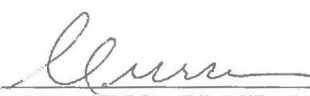

In response to the homeless crisis affecting all residents and stakeholders in the City, including more than 27,000 unsheltered homeless persons, the Council and Mayor established the A Bridge Home (ABH) program to develop temporary shelters across the City. While the goal is to find permanent housing for all homeless residents, ABH sites are designed to be “no-barrier” shelters that provide a wide range of services that address the immediate needs of homeless individuals and families.

In order to help address the more than 2,600 unsheltered homeless residents in Council District 9, which includes approximately 230 unsheltered family members, staff should be instructed to determine the feasibility of developing the property located at 4601 S. Figueroa Street into an ABH facility that serves families.

I THEREFORE MOVE that the City Council instruct the City Administrative Officer, with the assistance of the Chief Legislative Analyst, the Bureau of Engineering, Los Angeles Homeless Services Authority, and any other affected City stakeholders, to evaluate the site located at 4601 S. Figueroa Street, in Council District 9, to determine if the property is suitable for development as an A Bridge Home Program facility.

I FURTHER MOVE that if a property is determined to be suitable for development as an A Bridge Home Program facility, the City Council instruct the City Homeless Coordinator to coordinate with Los Angeles County to identify funds for operations at the site, including, but not limited to, State funding and County Measure H revenue.
