SUMMARY

At the meeting held on December 4, 2019, your Public Works and Gang Reduction Committee considered a CAO report relative to funding from the IF for Project Sanitary Stations from the LAPD. The CAO reports that the Los Angeles Police Protective League (LAPPL), an organization representing over 9,000 sworn members of the LAPD, submitted the Project Sanitary Stations pilot on behalf of the LAPD. According to LAPPL, LAPD officers have been

contracting viruses and diseases at an alarming rate and a main contributor to this increase in illnesses is due to pathogens entering police facilities on the soles of officer's shoes. This pilot aims to reduce the number of pathogens tracked in to LAPD's Central Community Police Station (Central Division). Through the pilot, officers would utilize HealthySole UV shoe sanitizer, which is stated to kill 99.9 percent of pathogens on the soles of shoes in eight seconds. If successful, LAPPL states that this pilot will reduce the number of officers contracting illnesses and diseases as well as help LAPD determine the long-term viability and durability of the machines. After an opportunity for public comment was held, the Committee moved to approve the CAO's recommendations, as detailed above. This matter is now forwarded to the Council for its consideration.

Respectfully Submitted,
