- c. What programs are designed to serve each acuity level and what amount and percentage of money spent citywide and countywide on homeless programs do those programs constitute.
- d. What is the number and percentage of people, by service provider area (SPA), with high acuity scores who have been housed by programs serving that population.
- e. What is the number and percentage of people, by SPA, with midrange acuity scores who have been housed by programs serving that population.
- f. What is the number and percentage of people, by SPA, with low acuity scores who have been housed by programs serving that population.
- g. What data, if any, does LAHSA have on people who's acuity score has gotten higher over time.
