**Comments for Public Posting:** I am opposed to removing Pierce College from Council District 3. This appears to be a political real estate grab and serves no purpose, other than to reduce the effectiveness of interactions between the College and all neighbors directly adjacent to the south of the campus. As a reminder, Pierce College does not have any residents on their site and the college is used by Taft High School (in CD3) as the location for their cross country track activities. The Orange Line is a better dividing line as it will keep the community intact. Also, I live on Aetna Street in Woodland Hills and the suggestion of splitting the north side of Aetna Street and Exhibit Place from the south side of these small streets, to be moved out of CD3 and linked separately with the Pierce College redistricting move, will disrupt our neighborhood in how we interact with our city representative. We need to keep Pierce College and the entire Carlton Terrace neighborhood intact. Therefore, it is imperative that our entire area in Woodland Hills needs to be served within the same City District. It is unacceptable to suggest this reallocation and split of Council District for my community. This MUST be removed from your consideration.

**Comments for Public Posting:** I have lived on Aetna St in Woodland Hills for more than 30 years and completely oppose this redistricting plan. It is a far better idea to redraw north of MTA line near Victory. The idea that you are going to divide Aetna St in half isolates and divides our Neighborhood. Please reconsider what your taxpayers don't want to do. Thank you.
