Update to a Previous Input: No

Directed To: City Council and Committees

Council File Number: 20-0835

Agenda Date:

Item Number:

Summary: In September of this year Los Angeles experienced a punishing heat wave. Woodland Hills reached a record-busting 121 degrees while adjacent cities and neighborhoods weren't far behind. These life-threatening temperatures were accompanied by poor air quality in the form of ozone and particulate pollution. While the effects of climate change continue to dog us while we push towards a more sustainable future, we can expect more of the same in the coming years. As such, we support motion 20- 0835, and urge the City Council to promote sustainable cooling and heating options in buildings, such as heat pumps.
