**Comments for Public Posting:** please reconsider the banning of the PBR and rodeos from holding events in LA or any city in California. we follow the PBR all thru out the USA. these young bull riders are the nicest bunch of young men you would want to meet. they have strong cowboy values, respect for God and country and are so appreciative of their fans. we have had the opportunity to meet and chat with the stock contractors who own the bulls at numerous events. they love their animals and treat them very well. the bulls are like family pets to them. they are the stock contractors lively hood and they make sure the bulls are not harmed. IT IS NOT TRUE that the flank rope ties up the bulls genitals. it is not near them, and if you have seen a bull buck, you can see the genitals "flapping in the breeze" when he is bucking!! these bulls are bred to buck and are trained that way at young age. honestly the bulls are probably treated better than the bull rider on their backs. thank you for listening and i hope this helps to change your minds. marlene nelson tinley park illinois marnelson75@comcast.net
