Comments for Public Posting: I am posting a comment here to save the rodeo in Los Angeles. Rodeo has always been a part of western culture. The west was built on cowboys doing these events daily and these practices have now been consolidated into an entertainment for everyone to see how our state used to be. Whether you are from California or Mexico, it is a part of our history and culture. With rodeo, all efforts are taken to treat the animals with compassion and respect. These animals are given the very best feed and care. I would encourage anyone who has questions to talk to someone who manages a rodeo or a stock contractor to become better informed as to how well the animals are treated. Taking rodeo away takes away our history. It should be celebrated in a safe environment which is what rodeo does. Thank you.
