Comments for Public Posting: The emasculation of America must stop! The fall of Rome is attributed to the feminization of Roman men, leaving their nation vulnerable to attack and being conquered. Rodeo depicts the ultimate of masculinity, and is not cruelty to animals. Those animals are coddled, well-fed and sheltered their whole lives! A few hours each month in the arena is just their way of earning their keep, which is a Royal keep for sure! Please consider all the men and women the world over who love rodeos and the great ambience they create in the community . Sincerely, James Freeman
