Date: 07/03/2021

Update to a Previous Input: No

Directed To: City Council and Committees

Council File Number: 21-0002-S37

Agenda Date:

Item Number:

Summary: According to the world's leading scientists, the world MUST cut emissions by more than 45 percent by 2030 and reach net zero emissions by 2050 to stop warming at 1.5 degree Centigrade and drastically roll back emissions that have become part of "daily business" in our carbon-based economy. The City of Los Angeles has committed to exceeding the Paris Agreement in its 2019 Green New Deal Pathway to cut greenhouse emissions by more than 50% below 1990 by year 2025 by implementing the City Council's Climate Emergency Mobilization Office (CEMO), which will be responsible for mobilizing the City to exceed the commitments of LA's Green New Deal. Senate Bill 260 (Weiner), the Climate Corporate Accountability Act (CCAA), would be the first law in the country to require US-based companies doing business in California and generating over \$1 billion in gross annual revenue to disclose their greenhouse gas emissions and set science-based targets to reduce those emissions. Under the CCAA, the California Air Resources Board (CARB) would be required to develop science-based emission targets and adopt resolutions to require businesses to publicly disclose all scope 1 (emissions released on site or from vehicles), scope 2 (indirect emissions from electricity purchased and used) and scope 3 (emissions from assets not owned or controlled by the reporting businesses) emissions, for the prior calendar year in an understandable manner and accessible to all residents, and gives companies until 2025 to begin setting their emissions reduction targets, a process which will also be overseen by CARB. SB 260 will force businesses to report emissions and their full carbon footprint, making it less difficult to regulate emissions, set appropriate reduction targets, and end activities that are creating potentially devastating environmental and health impacts for residents.

Committee Meeting Date: April 19, 2021

Board Meeting Date May 17, 2021

File # :	SB 260 (Weiner) (21-0002-S37)
Title :	The Climate Corporate Accountability Act (CCAA)
Type :	Controlling greenhouse gas emissions
City/State :	City of Los Angeles

Summary :	<p>According to the world’s leading scientists, the world MUST cut emissions by more than 45 percent by 2030 and reach net zero emissions by 2050 to stop warming at 1.5 degree Centigrade and drastically roll back emissions that have become part of “daily business” in our carbon-based economy. The City of Los Angeles has committed to exceeding the Paris Agreement in its 2019 Green New Deal Pathway to cut greenhouse emissions by more than 50% below 1990 by year 2025 by implementing the City Council’s Climate Emergency Mobilization Office (CEMO), which will be responsible for mobilizing the City to exceed the commitments of LA’s Green New Deal. Senate Bill 260 (Weiner), the Climate Corporate Accountability Act (CCAA), would be the first law in the country to require US-based companies doing business in California and generating over \$1 billion in gross annual revenue to disclose their greenhouse gas emissions and set science-based targets to reduce those emissions. Under the CCAA, the California Air Resources Board (CARB) would be required to develop science-based emission targets and adopt resolutions to require businesses to publicly disclose all scope 1 (emissions released on site or from vehicles), scope 2 (indirect emissions from electricity purchased and used) and scope 3 (emissions from assets not owned or controlled by the reporting businesses) emissions, for the prior calendar year in an understandable manner and accessible to all residents, and gives companies until 2025 to begin setting their emissions reduction targets, a process which will also be overseen by CARB. SB 260 will force businesses to report emissions and their full carbon footprint, making it less difficult to regulate emissions, set appropriate reduction targets, and end activities that are creating potentially devastating environmental and health impacts for residents.</p>

Type :	Controlling greenhouse gas emissions

GR Position :	
Vote :	

“YES” Vote:	Means you support the provisions of SB 260, which would require companies doing business in California and having \$1 billion in gross annual revenue to disclose their greenhouse gas emissions and set science-based targets to reduce those emissions.
-------------	---

“NO” Vote:	Means you do NOT support the provisions of SB 260, which would require companies doing business if California and having \$1 billion in gross annual revenue to disclose their greenhouse gas emissions and set science-based targets to reduce those emissions.
