

PUBLIC WORKS COMMITTEE REPORT relative to the Street Damage Restoration Fee (SDRF) calculation methodology for small excavations; and to continue developing standards for trenchless technologies such as horizontal boring and punching technologies.

Recommendations for Council action:

1. REQUEST the City Attorney, with assistance from the Bureau of Engineering (BOE) and Bureau of Street Services, to draft an Ordinance such that the SDRF calculation methodology for small excavations applies to the direct excavation area only and that the extra 5 feet that is currently applied to all sides of excavations not be applied to these smaller excavations, and to exempt sewer lateral repairs.
2. INSTRUCT the BOE to continue to develop standards for trenchless technologies such as horizontal boring and punching technologies.

Fiscal Impact Statement: None submitted by the BOE. Neither the City Administrative Officer nor the Chief Legislative Analyst has completed a financial analysis of this report.

Community Impact Statement: None submitted.

### SUMMARY

At the meeting held on June 23, 2021, your Public Works Committee considered a BOE report relative to the SDRF calculation methodology for small excavations; and to continue developing standards for trenchless technologies such as horizontal boring and punching technologies. After an opportunity for public comment, the Committee moved to approve the BOE's recommendations as amended, as detailed above. This matter is now forwarded to the Council for its consideration.

Respectfully Submitted,

PUBLIC WORKS COMMITTEE
