Comments for Public Posting: Please secure the area. One of the people camping at that area almost knocked down my father. His tenants on the second floor had their security camera ripped out by one of these guys after he continuously banged on their back door at 5:45 am and tried to get in. He then proceeded up the front stairs to the front door, hitting, and trying to rip out their Ring doorbell. He left only after he was told the police are on their way. Please clean out the area and keep the people living there safe.

Comments for Public Posting: Insanity has been allowed to take OVER our streets as we are not safe to even walk safely during the day! The City Council and Mayor must take BACK our “normal” life, safe streets where homeless , criminals, mentally ill are ALLOWED by laws and the LA Politicians to live wherever they want and this INSANITY must be stopped NOW! Not only enforce this law to stay away from schools, etc and Post Offices and anywhere else so we are able to be safe again in our neighborhoods, community and City. You are supposed to work for all of us and up to now if you were in a business you all would have been fired a long time ago ! Please let this law be the start of reclaiming our streets . THIS is a Cancer that must be NOW stopped.
