MOTION

The Los Angeles Fire Department (LAFD) maintains a relentless commitment to operational effectiveness. In 2023, a Standards of Cover (SOC) analysis (Board of Fire Commissioners Report 23-055) that was requested to be analyzed in the context of the City's budget (Council File 23-0332) was presented to the Council to measure the effectiveness of the LAFD deployment model. This SOC focused on Emergency Medical Service (EMS) deployment through the years 2018-2020.

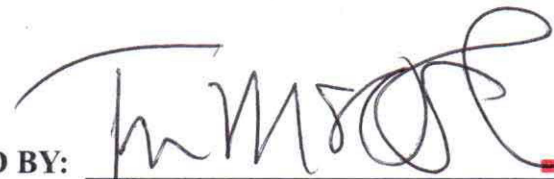

A second SOC was recently completed in partnership with the International Association of Fire Fighters (IAFF). This SOC provides a broad analysis of LAFD response during 2018-2022 in comparison to National Fire Protection Association (NFPA) standard 1710 and offers incremental steps to improve the effectiveness of resource deployment.

Given the recent emergency due to the firestorm, the City must push towards compliance with the SOC's and the guidance in the studies when it comes to focusing on the optimization of sworn resource deployment and addressing Citywide fire suppression and emergency medical needs.

I THEREFORE MOVE that the Los Angeles Fire Department (LAFD) be instructed to report with an update on the City's compliance with the Standards of Cover analysis, and the City meeting the guidance and specifications under the International Association of Fire Fighters Standards of Cover.

I FURTHER MOVE that the LAFD and the City Administrative Officer (CAO) report on available county, state, or federal funding that may be available for the restoration of fire stations or services.
