A Neighborhood Council Community Impact Statement (CIS) has been successfully submitted to your Commission or City Council. We provided information below about CISs and attached a copy of the CIS.

We encourage you to reach out to the Community Impact Statement Filer to acknowledge receipt and if this Community Impact Statement will be scheduled at a future meeting. Neighborhood Council board members are volunteers and it would be helpful if they received confirmation that you received their CIS.

The CIS process was enable by the to Los Angeles Administrative Code §Section 22.819. It provides that, "a Neighborhood Council may take a formal position on a matter by way of a Community Impact Statement (CIS) or written resolution." NCs representatives also testify before City Boards and Commissions on the item related to their CIS. If the Neighborhood Council chooses to do so, the Neighborhood Council representative must provide the Commission with a copy of the CIS or rResolution sufficiently in advance for review, possible inclusion on the agenda, and posting on the Commission's website.Any information you can provide related to your agenda setting schedule is helpful to share with the NC.

If the CIS or resolution pertains to a matter *listed on the Commission's agenda*, during the time the matter is heard, the designated Neighborhood Council representative should be given an opportunity to present the Neighborhood Council's formal position. We encourage becoming familiar with the City Councils rules on the subject. At the Chair's discretion, the Neighborhood Council representative may be asked to have a seat at the table (or equivalent for a virtual meeting) typically reserved for City staff and may provide the Neighborhood Council representative more time than allotted to members of the general public. They are also permitted up to five (5) minutes of time to address the legislative body. If the CIS or resolution pertains to a matter *not listed on the agenda*, the designated Neighborhood Council representative may speak during General Public Comments.

We share this information to assist you with the docketing neighborhood council items before your board/commission. If you have questions and/or concerns, please contact the Department of Neighborhood Empowerment at empowerla@lacity.org.

Type of NC Board Action: For

Impact Information

Date: 11/13/2023

Update to a Previous Input: No

Directed To: City Council and Committees

Council File Number: 23-0914

Agenda Date:

Item Number:

Summary: Over the years oversized vehicles has increased tremendously. Since 2022, it has increased a surprising 9.5%. This has lead to many people living in their cars because they can't afford homes. They buy RVs and park in the street. This is a major problem as they take up parking for other cars, furthermore they litter and leave the streets messy. It is bad for the society as they also receive tickets. They get taken away from the area but this doesn't stop the problem, they just go somewhere else. The problems doesn't get fixed and instead just spread problems somewhere else. These problems include, making homes with blankets and things they find on the street. It makes the street unsanitary and makes people scared to walk past the street. This unsanitary can also spread diseases , these diseases can be spread towards us and others worldwide. With this unsanitary, they also use stoves to cook and use fire to make food. This can

be a hazard as they can start a fire and cause a big problem. An example is the freeway 10, homeless people burnt the freeway and this caused the freeway to close down. It affected many people as people need that freeway to go to work. The city also has to waste time to fix and it is all because of the homeless people. This is due to people having large vehicles as they don't have anywhere to cook, they cook outside. It can be fixed by having homeless all in place and not all spread out everywhere. This can help with the street and the community to feel much safer. This is because cooking outside attracts homeless people and the homeless people come to make tents and live with the people with large vehicles. It is not good for the environment and is a problem that needs to be stopped. Los Angeles already has lots of homelessness and this will just add on to this. The homeless all need a place to stay so they don't harm and we and the environment benefit from it.
