A Neighborhood Council Community Impact Statement (CIS) has been successfully submitted to your Commission or City Council. We provided information below about CISs and attached a copy of the CIS.

We encourage you to reach out to the Community Impact Statement Filer to acknowledge receipt and if this Community Impact Statement will be scheduled at a future meeting. Neighborhood Council board members are volunteers and it would be helpful if they received confirmation that you received their CIS.

The CIS process was enabled by the Los Angeles Administrative Code §Section 22.819. It provides that, "a Neighborhood Council may take a formal position on a matter by way of a Community Impact Statement (CIS) or written resolution." NCs representatives also testify before City Boards and Commissions on the item related to their CIS. If the Neighborhood Council chooses to do so, the Neighborhood Council representative must provide the Commission with a copy of the CIS or resolution sufficiently in advance for review, possible inclusion on the agenda, and posting on the Commission's website. Any information you can provide related to your agenda setting schedule is helpful to share with the NC.

If the CIS or resolution pertains to a matter *listed on the Commission's agenda*, during the time the matter is heard, the designated Neighborhood Council representative should be given an opportunity to present the Neighborhood Council's formal position. We encourage becoming familiar with the City Council's rules on the subject. At the Chair's discretion, the Neighborhood Council representative may be asked to have a seat at the table (or equivalent for a virtual meeting) typically reserved for City staff and may provide the Neighborhood Council representative more time than allotted to members of the general public. They are also permitted up to five (5) minutes of time to address the legislative body. If the CIS or resolution pertains to a matter *not listed on the agenda*, the designated Neighborhood Council representative may speak during General Public Comments.

We share this information to assist you with the docketing neighborhood council items before your board/commission. If you have questions and/or concerns, please contact the Department of Neighborhood Empowerment at empowerla@lacity.org.

Re: Motion recommending additional funding for the speed hump program

The following motion was approved by the Coastal San Pedro Neighborhood Council Board at the April 21, 2025 Board meeting:

Whereas, on April 9, 2022, Coastal San Pedro Neighborhood Council requested that the District 15 Council Office immediately take action to ensure that LADOT provides speed humps in this area to

mitigate the threat of speeding vehicles on these streets so local residents can once again feel safe, but no action has been taken;

Whereas, LADOT will not be opening applications for the 2025 Residential Speed Hump Program cycle and instead is proposing to transition from the current application-based system, organized by Council District, to a process that prioritizes speed hump locations based on the City's safety and equity goals;

Whereas, with this change, many Council Districts would be excluded from any consideration for new speed humps;

Whereas, the City's 2024-2025 Budget reflects a reduction of Residential Speed Hump Program funding from \$1,900,000 to \$715,000;

Whereas, according to data provided by LADOT, in 2023, over 300 Angelenos were killed and over 1,600 were seriously injured in vehicle collisions, and speeding is the primary contributing factor to the severity of traffic collisions;

Whereas, LADOT uses a variety of tools to slow vehicles — roadway reconfigurations, traffic signals, stop signs, raised crosswalks, and speed humps — and speed humps in particular have proven to be one of the most effective methods for reducing vehicle speeds and preventing crashes;

Whereas, a 2021 UCLA study concluded that speed humps are the most cost-effective and reliable traffic-calming measure for improving transportation safety on residential streets; and

Whereas, based on a study by LADOT of best practices in 12 other major north-American cities, with a reduced \$715,000 annual budget Los Angeles would fall to the lowest funding of residential speed humps per capita of all 13 major cities.

Resolved, the Coastal San Pedro Neighborhood council requests that other funding sources, including grants, budget transfers, and Council District discretionary funding, be explored so that funding for the Speed Hump Program can be returned to its prior funding levels and the program can continue to be organized by Council District, based on local needs.

Please contact Robin Rudisill, Chair of the CSPNC Planning Committee, at 310-721-2343 should you have any questions related to this letter and motion.
